1.3 Deal Type × Stage Matrix

Commonality, variation and redundancy across the 11 deal types

Deliverable	1.3 Deal type × stage matrix
Version	0.8 – built from source maps and 1.2 v0.3; step-level cells to be confirmed in WS-02 to WS-10; v1.0 at Week 5
Source	1.2 As-Is Process Maps v0.3; RFP deal-type definitions and 12-month volumes; 1.1 taxonomy
Owner	WS1 Journeys & Process (BPR/TOM Lead)
Accepted by	Design Authority
Tests	Hypotheses B1 (shared deal start), B2 (parameterised decision flow), B3 (redundant types), B4 (controls as rules)

1. Purpose and method

The matrix answers one question: **how much of the process actually differs by deal type?** If the answer is "very little", the to-be design can use a small number of journey patterns with deal-type parameters, and the Replacement Programme configures one workflow with rules rather than eleven. If the answer is "a lot", the deal types stay. The matrix is the evidence either way.

Method

1. Every L4 step from the 1.2 maps is listed once, grouped by the four source stages (Lead & Customer; Deal & Credit; Completion & Fulfilment; Post-approval and servicing events).
2. Each live deal type (or the journey it uses) is a column. For each cell: ● the step occurs in the same form; ◆ it occurs with a variation (footnoted); — it does not occur.
3. Variations are classified: [P] parameter (same step, different value: which product, which authority level, which items); [F] flow (different path or additional step); [A] actor (same step, different role).
4. Commonality per stage = steps marked ● in all columns where the stage applies ÷ total steps in the stage.
5. Deal types with no live customer process are excluded from the step matrix and handled in §5.

Columns

Col	Deal type(s)	Journey maps	12-m vol.	%
NM	New (New Money); Increase	NM-1/2/3	3,033	9.9
RN	Renewal	RN-1/2/3	12,938	42.3
EP	Extension Pending Review	RN-1/2/3	1,919	6.3
VA	Variation	VA-1/2/3	7,277	23.8
RF	Remove All Facilities (recorded under Variation, TBC)	RF-1/2	in VA	—
CR	CAP Referral	CR-1/2	794	2.6
CS	CAP Strategy	CS-1/2	722	2.4
SL	Shadow Limit / Staged Drawdown origination (recorded as New with product)	SL-1/2/3	in NM	—
SR	Shadow Limit Reallocation	SR-1/2	62	0.2
SD	Staged Drawdown Allocation (recorded as Staged Drawdown + request type Variation)	SD-1/2	TBC	—

Excluded from the step matrix: Staged Drawdown as an origination type (0 deals), ESR Cleanse (3,816; records transfer), DO NOT USE. See §5.

2. Step-level matrix

#	Step (from 1.2)	NM	RN	EP	VA	RF	CR	CS	SL	SR	SD	Variation notes
STAGE 1 · LEAD, CUSTOMER & OPPORTUNITY												
1.01	Trigger / lead received	◆	◆	◆	◆	◆	◆	◆	◆	◆	◆	P Trigger differs by type: customer enquiry (NM, SL), renewal report (RN, EP), customer request (VA, RF, SR, SD), distress signal (CR), SBS decision (CS). Same step, different source.
1.02	Login	●	●	●	●	●	●	●	●	●	●	
1.03	View landing page	●	●	●	●	●	●	●	●	●	●	
1.04	Search for customer	●	●	●	●	●	●	●	●	●	●	
1.05	Customer located	●	●	●	●	●	●	●	●	●	●	
1.06	Record customer details (not found)	●	—	—	—	—	—	—	●	—	—	New-to-bank only
1.07	Retrieve customer details / identify contact	●	●	●	●	●	●	◆	●	●	●	A CS: performed by SBS
1.08	Any additional parties?	●	◆	◆	◆	—	—	—	●	—	—	F RN/EP: “yes” diverts to Variation journey. VA: parties amended in system before assessment
1.09	Lending or deposit?	●	—	—	—	—	—	—	—	—	—	Only point where deposits branch
1.10	Create opportunity	●	—	—	—	—	—	—	●	—	—	Source note: system should allow deal without opportunity
1.11	Select product(s)	●	—	—	—	—	—	—	◆	—	—	P SL: Shadow Limits product or Term Lending with tranches
1.12	Passes initial overview?	●	—	—	—	—	—	—	●	—	—	Control C0; undocumented criteria
1.13	Contact customer to progress	●	◆	◆	—	—	—	—	●	—	—	F RN/EP: contact happens first, on trigger
1.14	Details of existing deal pulled through	—	●	●	●	●	●	●	—	●	●	Existing-deal journeys only (in NM/SL it occurs at stage 2)
1.15	Provide existing product balances	—	●	●	●	●	●	●	—	—	—	As 1.14
1.16	Create credit application / select deal type	—	—	—	—	—	—	—	—	◆	◆	P SR: selects “Shadow Limit Reallocation”. SD: selects “Staged Drawdown” + request type “Variation” (workaround)
1.17	Add / edit products within pre-approved limit	—	—	—	—	—	—	—	—	◆	◆	P SR: add new products, reduce shadow limit (C19). SD: edit tranche status Future → In Progress (C19)
STAGE 2 · DEAL & CREDIT												
2.01	Convert / progress deal	●	●	●	●	●	●	●	●	●	●	
2.02	Pull through existing deal; existing balances	●	●	●	●	●	●	●	●	●	●	Occurs at stage 1 or 2 depending on journey; same step
2.03	Customer analysis	●	◆	◆	◆	—	●	●	●	—	—	P “for renewal / variation”: fewer items; EPR fewest. Content differs, step does not

2.04	Credit analytics (C2)	●	◆	◆	◆	—	●	◆	●	—	—	P "if required" on RN, EP, VA, CS; criterion undefined
2.05	Customer identifies / provides additional information	●	●	●	●	—	●	●	●	—	—	
2.06	Update system incl. balances	●	●	●	●	◆	●	◆	●	—	—	P RF: zero facility, release security, withdraw covenants. CS: products to existing credit, expiry 12 months, limits may reduce
2.07	Progress? (RM go / no-go)	●	◆	◆	◆	—	—	—	●	—	—	P "No" leads to: Decline (NM, SL) / Withdraw facilities (RN, EP) / Remove facilities (VA)
2.08	Validate the deal (C3)	●	●	●	●	—	●	●	●	●	●	
2.09	Check facility letter / agreement docs (C4)	●	●	●	●	—	—	—	●	●	◆	P SD: off-platform drawdown letter
2.10	Within delegated authority? (C5)	●	●	●	●	—	—	—	●	◆	◆	P SR/SD: "need credit approval?" — pre-approved, Credit only on material change (DCA 5 / PDQ)
2.11	Deal transferred to Credit	●	●	●	●	—	●	—	●	●	●	CR: always; CS: never (SBS authority)
2.12	Deal is assessed (C6)	●	●	●	●	—	●	—	●	●	●	
2.13	Client in financial distress? (C7)	●	●	●	●	—	—	—	●	—	—	Existing-customer deals only; absent on SR/SD per source
2.14	Credit decision (approve / decline / defer)	●	●	●	●	—	◆	—	●	◆	◆	P CR: decision is "progress to SBS / further info" (C13). SR/SD: approve / defer only in source
2.15	Deferred – further info loop (EX-02)	●	●	●	●	—	●	—	●	●	●	Unbounded on all
2.16	Declined → EX-01 loop	●	◆	◆	◆	—	—	—	●	—	—	P As 2.07
2.17	Credit approved within DA	●	●	●	●	—	—	—	●	●	●	
2.18	Update with approved decision	●	●	●	●	—	◆	●	●	●	●	P CR: "update with credit overview"
2.19	Transfer to SBS; SBS review and categorisation (C14)	—	—	—	—	—	●	—	—	—	—	F CR only: second authority
2.20	Forbearance assessment; team transfer; officer reassignment (C15)	—	—	—	—	—	●	—	—	—	—	F CR only
2.21	CAP Strategy memo; recovery updates (C16, C17); SBS approval (C18)	—	—	—	—	—	—	●	—	—	—	F CS only; replaces 2.09–2.17
2.22	In-flight CAP referral (EX-04)	●	●	●	●	—	—	—	●	—	—	Where 2.13 = yes
STAGE 3 · COMPLETION & FULFILMENT												
3.01	Trigger facility letter(s)	●	●	●	●	—	—	—	●	◆	●	P SR: two or more letters (reduced shadow limit + each new deal)
3.02	RM advises Lending Services to prepare security (EX-05)	●	—	—	◆	—	—	—	●	●	●	P VA: re-instructed by default even if security unchanged (to confirm)
3.03	FAL created and copy stored	●	●	●	●	—	—	—	●	●	◆	P SD: letter off-platform; SL shadow limit letter TBC
3.04	FAL sent by post / secure email (manual)	●	●	●	●	—	—	—	●	●	●	

3.05	Customer needs to sign?	—	●	●	◆	—	—	—	—	—	—	F RN/EP: explicit decision. VA: "if required" on the sign step. NM: always signs
3.06	Customer signs and returns	●	●	●	●	—	—	—	●	●	●	
3.07	3-month unreturned → back to pre-credit	●	—	—	●	—	—	—	●	●	●	Not shown on RN-3; to confirm whether it applies
3.08	FAL checked (C8)	●	◆	◆	●	—	—	—	●	●	●	A RN/EP: RM (BD) / Business Ops (SF) / Corporate Associate (Corp)
3.09	FAL updated as complete	●	—	—	●	—	—	—	●	●	●	RN-3 goes straight to ready-for-fulfilment
3.10	All pre-conditions met (C9)	●	—	—	◆	—	—	—	●	●	●	P VA: "all covenant & condition updates completed"
3.11	Lending Services mark security complete (C10)	●	—	—	●	◆	—	—	●	●	●	F RF: release, not perfect; Securities Team confirms
3.12	BLP marked ready for fulfilment	●	●	●	●	—	—	—	●	●	●	
3.13	Facility change required? / initial funds?	—	—	—	●	—	—	—	◆	—	—	F VA: skip fulfilment if no facility change. SL: skip if no initial funds
3.14	Message sent to fulfilment team	●	●	●	●	●	—	—	●	●	●	
3.15	Facility / funding fulfilled (C11)	●	●	●	●	◆	—	—	●	●	●	P RF: facilities removed
3.16	RM advised; BLP updated	●	●	●	●	●	—	—	●	●	●	
3.17	Repay outstanding balance; release security (C12)	—	—	—	—	●	—	—	—	—	—	F RF only
STAGE 4 · POST-APPROVAL AND TYPE-SPECIFIC RULES												
4.01	Change after approval → re-process (EX-03)	●	—	—	—	—	—	—	●	—	—	Noted on NM-2, SL-2 only
4.02	EPR: max 3 months; max 3 consecutive then Credit	—	—	●	—	—	—	—	—	—	—	Rule, not a step
4.03	Only maturity and review dates change; no rate change	—	●	●	—	—	—	—	—	—	—	Definitional rule for RN/EP
4.04	Skips CDQ → PDQ; DCA 5 unless Credit says otherwise	—	—	—	—	—	—	—	—	●	●	Rule: routing by prior approval
4.05	Auto-reoriginate at 90 days (batch)	?	?	?	?	?	?	?	?	?	?	Which types the batch job applies to: DR-09
4.06	Restructure flag available	●	—	—	—	—	—	—	—	—	—	New: restructure option; Increase: shows refinance element

● same step · ◆ variant (P parameter / F flow / A actor) · — absent · ? unknown pending data. Cells reflect 1.2 v0.3 and are confirmed in WS-02 to WS-10.

3. Commonality by stage

Stage	Steps	Same in all applicable types	Parameter variants	Flow variants	Actor variants	Commonality	Reading
1 Lead, Customer & Opportunity	17	5	5	3	1	**5 of 5 core steps (100%)**; 10 of 17 overall	Login → landing → search → located → retrieve is identical in all ten columns. Everything else at this stage is "new customer or existing deal": two variants, not ten.
2 Deal & Credit	22	9	9	4	0	**18 of 22 for the seven lending columns (82%)**	NM, RN, EP, VA, SL, SR, SD follow one flow. Variants are parameters (what analysis, which authority, what happens on "no"). The four flow variants are all CR/CS: the distressed journeys are a different flow.
3 Completion & Fulfilment	17	8	5	4	1	**13 of 17 for the six documenting columns (76%)**	NM, VA, SL, SR, SD share one completion flow. RN/EP is a subset (no security, no pre-conditions). RF is a mirror image (release rather than perfect).
4 Post-approval rules	6	0	—	—	—	n/a	These are rules, not steps. They are the content of the per-type rules table in Phase 2 (B4).

3.1 What this means for hypotheses B1–B4

Hypothesis	Test	Result from the matrix (pre-validation)
B1 Shared deal start	Stage 1 core steps 100% common	**Supported.** 5 of 5 core steps identical across all ten columns. One "deal start" component with two entry variants (new customer; existing deal).
B2 Parameterised decision flow	Stage 2 ≥ 80% common across lending types; differences expressible as rules	**Supported for lending types (82%).** Every variant in NM/RN/EP/VA/SL/SR/SD is a parameter. CR and CS are a genuinely different flow and should be their own pattern.
B3 Redundant types	Types with no live customer process	**Supported.** Staged Drawdown (0 deals; superseded by Term Lending tranches), ESR Cleanse (records transfer), DO NOT USE. Plus two un-typed journeys (RF, SD allocation) that are being recorded under other types.
B4 Controls as rules	Type-specific behaviours capturable as rules without residual flow difference	**Partly supported.** EPR caps, RN definitional constraints, SR/SD routing, restructure flag all express as rules. Residual flow differences: CR/CS (second authority), RF (release sequence), RN (no security). These are three pattern-level differences, not eleven.

4. Journey pattern candidates for Phase 2

Reading the matrix by column similarity gives five patterns. This is the input to design principle work in Week 8, not a decision.

Pattern	Deal types absorbed	12-m vol.	Stage 1	Stage 2	Stage 3	Parameters carried as rules
P1 New or Increased Lending	New, Increase, Shadow Limit / Staged Drawdown origination	3,033	Deal start + new-customer variant + opportunity + product	Full decision flow	Full completion with security	Product selection (incl. shadow limit, tranches); restructure flag; initial-funds decision
P2 Renewal	Renewal, EPR	14,857	Deal start + existing-deal variant; trigger from system task	Decision flow with **fast-track route** (L1) and full route	Short completion (letter optional; no security)	Fast-track eligibility criteria; EPR caps; "no structural change" validation; letter-required rule
P3 Servicing Change	Variation, Remove All Facilities, post-approval change (EX-03)	7,277	Deal start + existing-deal variant + party amendment	Decision flow with **materiality triage** (administrative vs. credit-relevant)	Full completion with "facility change?" and "security change?" gates; removal variant	Variation reason taxonomy; materiality rules; security re-instruction only when security changes; removal sequence
P4 Pre-approved Drawdown	Shadow Limit Reallocation, Staged Drawdown Allocation	62 + TBC	Deal start + existing pre-approved deal	**Exception-only** decision: validate, check limit, Credit only on material change	Completion with proportionate documentation	Material-change triggers; limit arithmetic (C19) automated; letter type (full FAL vs. notice)
P5 Distressed Connection	CAP Referral, CAP Strategy, in-flight referral (EX-04)	1,516	Deal start; trigger from distress indicators	Credit → SBS two-authority flow; categorisation; strategy	None (record-keeping deal)	Referral triggers; live-deal handling; forbearance and ERV fields (protected); SBS authority thresholds

Effect: 11 deal types → 5 patterns; 8 live types absorbed; 3 retired; 2 un-typed journeys given a home. Stage 1 is built once. Stage 2 is built twice (lending flow with parameters; distressed flow). Stage 3 is built once with three gates.

5. Deal types with no live customer process

Deal type	12-m vol.	Finding	Recommendation	Decision owner	By
Staged Drawdown (as origination type)	0	Zero deals. Tranches are set up on a Term Lending product at origination (SL-1 S9) and drawn via Staged Drawdown Allocation, which is recorded as “Staged Drawdown + request type Variation”.	Retire as an origination type. Make “Staged Drawdown Allocation” an explicit type (or P4 pattern) so the request-type workaround ends.	Design Authority	W7 (B-02)
ESR Cleanse	3,816	Records transfer from the orange lending file with exposure updates. No customer, no credit decision, no documentation. 12.5% of recorded volume.	Remove from the deal model. Specify the exposure updates migration must preserve (SD-01 option c). Restate all volume baselines excluding it.	SteerCo (SD-01)	W2 (G0)
DO NOT USE	—	Discontinued; still selectable (I-02).	Remove from pick list now (quick win on current BLP); exclude from replacement data model.	Bank BA / BLP admin	W3
Remove All Facilities (un-typed)	TBC	Mapped as its own journey; recorded under Variation (to confirm). Distinct completion flow (release, repay).	Give it a home in P3 as an explicit variant so removals are countable and the release sequence is controlled.	Design Authority	W7
Personal Association Lend	—	Out of scope for the replacement (RFP).	No action; confirm no dependency from ESR Cleanse exposure updates.	—	—

5.1 Restated volume base (excluding ESR Cleanse)

Deal type	12-m vol.	% of 30,561 (RFP)	% of 26,745 (live customer deals)
Renewal	12,938	42.3	48.4
Variation	7,277	23.8	27.2
Increase	2,338	7.7	8.7
Extension Pending Review	1,919	6.3	7.2
CAP Referral	794	2.6	3.0
CAP Strategy	722	2.4	2.7
New	695	2.3	2.6
Shadow Limit Reallocation	62	0.2	0.2
Staged Drawdown	0	0	0
Live customer deals	**26,745**	**87.5**	**100**
ESR Cleanse (excluded)	3,816	12.5	—

On the restated base, Renewal and EPR together are **55.6%** of live deals and servicing (P2 + P3) is **91.5%**. The case for designing servicing first is stronger than the RFP figures suggest.

5.2 Open items for validation

- Cells marked ◆ at 2.03/2.04 (“if required”): obtain the actual criterion, or confirm none exists (WS-04, WS-05).
- 3.07 on RN-3: does the 3-month reset apply to renewals? (WS-04)
- 3.02 on VA-3: is security re-instruction a real step or a default on the map? (WS-05)
- 4.05: which deal types the 90-day auto-reoriginate batch job acts on (DR-09).
- Column RF and SD volumes: how each is recorded today (DR-01).
