2.8 Process Requirements Pack

Journey configuration, rules catalogue, user stories, interface and data requirements for the BLP Replacement Programme

Deliverable	2.8 Process requirements pack, in the Programme's backlog structure (epics → stories → acceptance criteria)
Version	0.7 – interim release content (Week 10) complete for DD-01 to DD-07; full pack v1.0 at Week 13 after fit-gap (2.7) sets Fit / Configure / Custom per story and Design Authority sign-off (Week 12)
Derived from	2.2 patterns and components; 2.3 to-be maps and DDRs; 2.4 rule sets; 2.5 equivalence evidence; 2.6 gaps (W1); 1.8 protected fields; 1.7 workaround dispositions
Owner	WS4 Technology & Replacement Interface (Platform / Integration Analyst) with Bank BA
Accepted by	Replacement Programme BA Lead (acceptance into backlog, B-06); Solution Architect (deliverability); Design Authority (content)
Format note	Written to be loaded into the Programme's backlog tool (JD-04). Each story carries: ID, pattern / component, principle, source (DDR / RS / CE), MoSCoW for Release 1, acceptance criteria, data and control references, fit-gap placeholder. Stories are epic-level; the Programme decomposes them with the Bank BA.

1. Structure and conventions

Level	What	Count	Source
Epic	A shared component, pattern, exception path, rules capability, interface or data theme	14	2.2
Story	A unit of behaviour the platform must provide, expressed as “As a [role], I need [capability] so that [outcome]”, with acceptance criteria	≈ 95	2.3 steps and DDRs; 2.4 rule sets
Rule	A decision table in the rules catalogue, referenced by stories, maintained as data	14 (RS-01 to RS-14)	2.4
Non-functional	Audit, access, performance, reporting, migration constraints	§7	1.8; RFP §7; 2.5

Priority (Release 1)

MoSCoW	Meaning here
Must	Release 1 cannot deliver the pattern without it; or a protected field depends on it
Should	Release 1 target; a stated fallback exists if it slips (fallback named on the story)
Could	Release 2 candidate; design accommodates its absence

Conventions

- Story IDs: component / pattern prefix + number (SC1-03, P2-02, EXB-01, RUL-05, INT-02, DAT-04, NFR-07).
- “Platform” means the replacement system. “Rule” means a decision table from §4, evaluated with evidence written back (NFR-01).
- Acceptance criteria are testable; where they reference a threshold, the rules catalogue holds the value and the story holds the behaviour.
- Fit-gap column is populated by 2.7; blank at v0.7.

2. Epics and stories · shared components

EPIC SC1 · Deal start

DP-05, DP-08, DP-09 · DDR-002, DDR-007 · maps TB-SC1a/b

ID	Story	Priority	Acceptance criteria	Refs
SC1-01	As an RM, I need work to be created by system events (review date reached, request logged, tranche date, early-warning flag, referral) so that I do not depend on reports or email to know what to do	Must	Review-date task generated N days before review date (configurable, default 60); task appears in RM queue; tranche-date task from P1 schedule; flag event creates referral prompt; each event carries the connection reference	RS-11; OP-10
SC1-02	As an RM, I need the deal opened with customer, parties, existing facilities and balances loaded from the event so that I do not search or re-key	Must	Opening from a task shows connection, all parties, all facilities with limits/expiry/grade, balances as at last refresh with timestamp; no manual search required for event-triggered deals	F01–F05; INT-01
SC1-03	As the Bank, I need the early-warning flag evaluated at deal start so that distressed connections are excluded from fast routes and referral is prompted	Must	RS-11 evaluated on open and on submission; result and indicator values stored; flag = true sets route constraint and shows referral prompt; flag visible on queue	RS-11; CE-005
SC1-04	As the Bank, I need a party-completeness check so that partnerships and companies have all required parties recorded	Should (fallback: manual checklist)	Rule by customer type lists required party roles; missing role blocks submission with named gap	C1; CE-007
SC1-05	As an RM, I need to confirm scope (unchanged renewal / change reason / allocation) and have the pattern and rules set from it	Must	Scope capture per pattern; RS-03 reason codes mandatory for P3; pattern, deal type parameter, product, segment, risk band set; applicable rules loaded; P2 structural validation diverts term changes to P3	RS-03; 2.2
SC1-06	As a new customer, I need my enquiry captured as a lead with an SLA so that it is not lost	Should (fallback: RM-created lead)	Lead record from digital form or RM entry; SLA timer to first contact; status; conversion to deal without re-keying	OP-14; RS-14
SC1-07	As the Bank, I need the pre-screen applied as a rule with a recorded outcome and reason code	Must	RS-14 evaluated; outcome pass / decline / refer with code; decline routes to EX-A; MI on outcomes	RS-14; C0; CE-006
SC1-08	As an RM, I need to create or match the customer via CIF with parties so that KYC remains in CIF	Must	CIF search and match; create-in-CIF flow; match ID stored; no customer created in platform without CIF reference	INT-02; C1
SC1-09	As an RM, I need to capture products, limits, value and a tranche schedule for staged facilities so that P4 can draw on it	Must	Tranche schedule: date, amount, conditions per tranche; total = facility; editable until approval; consumed by P4	F04; P4
SC1-10	As a user, I need single sign-on and a landing page that is my work queue	Should (fallback: separate login)	SSO via Bank identity; landing page lists tasks by due date and SLA status; filter by pattern and segment	GT-11; OP-14

EPIC SC2 · Decision core

DP-01, DP-02, DP-03, DP-07 · DDR-001, 003, 006 · map TB-SC2

ID	Story	Priority	Acceptance criteria	Refs
SC2-01	As the Bank, I need the route (R-FULL / R-FAST / R-EXC) selected by rules on system-held data so that effort is proportionate to risk	Must	RS-01 (P2), RS-03 (P3), RS-02 (P4) evaluated at SC-2 entry; flag = true forces R-FULL; result, inputs and failing conditions stored and shown; RM may force R-FULL, never a fast route; R-FAST activation per segment is a configuration switch (PQ-001)	RS-01/02/03; CE-001/003

SC2-02	As an RM, I need the required items for my route shown as a checklist and enforced before submission	Must	RS-04 Collect result per route × pattern × band; each item mapped to a field or document type; submission blocked with named missing items; Credit may waive an item with reason	RS-04; C2, C3; CE-008
SC2-03	As the Bank, I need delegated authority determined automatically from the DA matrix held as data, with the level recorded	Must	RS-05 inputs read from deal; matrix version stored; required level and approver level recorded; approver below level cannot approve (attempt logged); escalation always allowed; determination failure defaults to Credit queue	RS-05; C5; CE-009
SC2-04	As an RM / line approver, I need to approve within authority with the eligibility and authority evidence attached automatically	Must	Approval screen shows route evidence, items, authority; approval writes decision, approver, level, timestamp; R-FAST approvals tagged for sampling	CE-001
SC2-05	As Credit, I need routed deals in a queue with SLA, timer and visibility to the RM	Must	Queue per Credit team; SLA per pattern configurable; position and age visible to RM; escalation at SLA breach to Credit manager	DP-04; OP-11
SC2-06	As Credit, I need to record a decision (approve / defer / decline / refer) with conditions and the distress judgement	Must	Decision types; conditions captured as structured items (feed G-CP, G-SEC); distress judgement field; approval writes terms as the document source	C6, C7
SC2-07	As the Bank, I need the “proceed / withdraw” RM decision recorded with reason instead of an unrecorded judgement	Should	Withdraw reason codes; MI on withdrawals by stage	DDR-003
SC2-08	As Credit, I need a sampling queue of fast-route approvals with findings capture and MI	Must (with R-FAST)	Sample selected per CE-001 rate and weighting; reviewer ≠ line approver; finding categories; monthly MI; suspension switch per segment	CE-001/003 §6.3
SC2-09	As the Bank, I need pre-approved allocations validated against terms with limit arithmetic enforced	Must	Σ allocations ≤ limit as hard block; shadow-limit headroom reduces automatically; RS-02 triggers evaluated; repayment schedule regenerated per tranche	RS-02; C19; CE-013

EPIC SC3 · Completion DP-04, DP-06, DP-07 · DDR-004, 005, 010 · map TB-SC3, TB-P3R

ID	Story	Priority	Acceptance criteria	Refs
SC3-01	As the Bank, I need facility letters and notices generated from approved terms using templates per pattern and product, including tranches and shadow limits	Must	RS-06 selects template and whether a signature is required; all terms merged from deal data; no free-text term entry; template versioning with change control; off-platform letters not needed for any product in scope	RS-06; CE-004; GT-03
SC3-02	As a customer, I need to receive, sign and return the letter electronically	Should (fallback: generation + tracking with manual send; OP-30)	E-delivery with issued status; e-signature with identity evidence; returned status; wet-ink exception path with upload and manual check by RS-13 role	GT-03; DB-05
SC3-03	As the Bank, I need returned letters reconciled to approved terms automatically	Should (fallback: manual C8)	E-signed document hash / fields compared to terms; pass sets G-DOC; fail blocks and alerts	C4, C8; CE-004
SC3-04	As the Bank, I need the graduated staleness control (chase, extend, re-validate, reset) on unreturned letters	Must	RS-08 schedule as timers; chase messages logged; RM extension with reason at week 10; 3-month re-validation evaluates listed facts and records result; reset at 6 months or on RS-12 material change; MI on all stages	RS-08; CE-002; EX-E
SC3-05	As Lending Services, I need security instructions generated from approval conditions into my queue when RS-07 applies	Must	Instruction content = conditions; LS queue with SLA; execution and registration status; evidence upload; G-SEC set on completion; no instruction when RS-07 says security unchanged	RS-07; C10, C23; CE-010
SC3-06	As an RM, I need conditions precedent itemised from the approval and each evidenced, with a single view of all gates	Must	CP items generated from conditions; evidence per item; G-DOC / G-SEC / G-CP status on one screen; gates applicable per pattern variant	C9; OP-13; CE-010
SC3-07	As Fulfilment, I need a task created automatically when all applicable gates are met, with SLA	Must	Fulfilment queue; task carries terms; completion records account details and status; RM notified; no message-based hand-off	C11; OP-11
SC3-08	As the Bank, I need the removal sequence enforced: balance check, shared-security check, physical release before system release, then facility removal	Must	Balance = 0 check (INT-01) blocks until clear; shared-security rule identifies dependencies; Securities task before system release; Fulfilment task; associated-party deals updated by rule	TB-P3R; C10, C12; CE-011

EPIC P5 · Distressed connection DP-08, DP-09 · DDR-011 · map TB-P5

ID	Story	Priority	Acceptance criteria	Refs
P5-01	As an RM or Credit, I need to raise a referral as a record on the connection, linking live deals and recording their status	Must	Referral record with trigger, summary; linked deals with hold / continue / decline status; no transfer of deal ownership until acceptance	C13, C14
P5-02	As Credit and SBS, I need to review the referral in parallel or sequence per CAP policy configuration	Should (fallback: sequential)	Configuration switch per trigger type (PQ-002); both decisions recorded; acceptance requires both	PQ-002
P5-03	As SBS, I need categorisation, forbearance assessment, structured strategy memo, recovery fields and approval captured in validated structured form	Must	Fields per 1.8 F10, F11 with validation; memo template with narrative sections; SBS authority via RS-05; outcome codes; all protected fields unchanged in definition	C15–C18; F10, F11
P5-04	As SBS, I need ownership transferred to me with an audit trail on acceptance	Must	Transfer record (from, to, date, reason); history retained; bulk transfer with line approval; Corporate access check	C26, C27; CE-016
P5-05	As SBS, I need a queue of flagged connections and open referrals	Should	Queue from RS-11 flags and referral status; ageing; T8 metric	RS-11

3. Epics and stories · exception paths and patterns

EPIC EX · Exception paths

DP-07 · DDR-005, 006 · maps TB-EXA/B/C/E

ID	Story	Priority	Acceptance criteria	Refs
EXA-01	As the Bank, I need every decline recorded with a reason code and the customer informed by template	Must	Reason code mandatory at every decline point; templated communication generated and logged; decline MI by stage, code, segment	C20; CE-006
EXA-02	As a customer, I need an appeal route reviewed independently	Should	Appeal window configurable; reviewer assigned ≠ original assessor; outcome recorded; overturn re-enters SC-2	C21; CE-006
EXA-03	As an RM, I need defined referral destinations for declines	Could	Destination list configurable; referral recorded	EX-A
EXB-01	As Credit, I need to defer with a structured request (items, owner, due date) and a loop counter	Must	Request items from RS-04 or categorised free text; owner RM / customer; due dates with timers; counter increments; same assessor retained on resubmission	RS-09
EXB-02	As the Bank, I need deferral bounded with escalation at the limit	Must	At counter = RS-09 limit, escalation task to Credit manager with outcome options; R2, R3 metrics	RS-09; DP-07
EXB-03	As a customer, I need to respond to information requests through the platform	Should (fallback: RM uploads)	Customer-facing request with upload; status visible to RM	DP-06
EXC-01	As the Bank, I need post-approval changes classified by materiality rule and routed accordingly	Must	Fields changed captured; RS-12 evaluated; non-material regenerates documents and logs; material returns to SC-2 with change highlighted and assessor retained; unclassified field = material	RS-12; C22; CE-014
EXE-01	(see SC3-04)	—	—	—

EPICS P1–P4 · Pattern configuration

DP-01, DP-10 · DDR-012 · compositions TB-P1 to TB-P4

ID	Story	Priority	Acceptance criteria	Refs
PAT-01	As the Bank, I need five patterns configured as compositions of SC-1/2/3 with pattern-specific segments, and deal type held as a parameter	Must	P1–P5 selectable by trigger / scope; deal_type values New, Increase, Renewal, EPR, Variation, Referral, Strategy, Reallocation, Allocation as parameters; no workflow per type; retired types absent from pick lists	2.2; DD-02
P1-01	As an RM, I need the restructure / refinance flag and initial-funds decision on P1	Must	Flag on deal; initial-funds decision at SC-3 release; shadow limit with no drawdown ends at G-DOC and awaits P4	2.2 P1
P2-01	As the Bank, I need structural-change validation on renewals and EPR limits enforced	Must	Any change beyond commentary, request type, review and maturity dates diverts to P3; EPR extension ≤ 3 months; counter; third forces R-FULL; fourth blocked; rate change not permitted on EPR	RS-10; 2.2 P2
P2-02	As the Bank, I need R-FAST on renewals switchable per segment pending PQ-001	Must	Configuration flag; when off, P2 runs R-FULL with automated DA	PQ-001; CE-001
P3-01	As an RM, I need the variation reason taxonomy captured and routing, letter, security and fulfilment gates set from it	Must	RS-03 codes with most-material-wins; outcomes per code; V-06 redirects to P1; V-11 to removal; V-12 always R-FULL	RS-03; CE-003
P4-01	As an RM, I need allocation screens for shadow limits and tranches with documents generated on platform	Must	Allocation against pre-approved deal; headroom shown; notice for reduced limit; agreement for new facility; tranche confirmation; no off-platform document	2.2 P4; RS-06

4. Rules catalogue

Fourteen decision tables, content in 2.4, owned as data. Each requires the capabilities in RUL-01 to RUL-05.

ID	Rule set	Evaluated at	Hit policy	Owner	Release 1
RS-01	Renewal fast-track eligibility	SC-2 entry (P2); re-evaluated at submission	Any (all true)	Credit Risk Policy	Must (switchable)
RS-02	Material-change triggers (P4)	SC-2 entry (P4)	Any trigger	Credit Risk Policy	Must
RS-03	Variation reason taxonomy and materiality	SC-1a scope; SC-2 entry (P3)	First (most material)	Credit Risk Policy / Lending Ops	Must
RS-04	Required analytics and submission items	SC-2 submission	Collect	Credit Risk Policy	Must
RS-05	Delegated-authority determination	SC-2 S3; P5 approval	First (lowest sufficient)	Credit Risk Policy	Must
RS-06	Letter template and letter-required	SC-3 S1	First	Lending Ops	Must
RS-07	Security gate and re-instruction	SC-3 S4	First	Lending Services	Must
RS-08	Staleness and chase schedule	SC-3 timers	Schedule	Lending Ops	Must
RS-09	Loop limits and escalation	EX-B	Threshold	Head of Credit	Must
RS-10	EPR limits	P2	Threshold	Credit Risk Policy	Must
RS-11	Early-warning flag composition	SC-1a S3; submission; P5	Any indicator	Credit Risk / SBS	Must (indicators available in R1; conduct feed R2)
RS-12	Post-approval materiality	EX-C	First; default material	Credit Risk Policy	Must
RS-13	Approver by segment and route	SC-2 approval; SC-3 wet-ink check	Lookup	Lending Ops	Must
RS-14	Pre-screen criteria and reason codes	SC-1b S2	First	Lending Ops / Conduct	Must

EPIC RUL · Rules capability DP-02 · GT-04

ID	Story	Priority	Acceptance criteria
RUL-01	As a rule owner, I need decision tables maintained as data with versioning and effective dates, without a system release	Must	Table editor or import; version history; effective-dated; change requires owner approval (four-eyes); prior versions retained for evidence
RUL-02	As the Bank, I need every rule evaluation to write evidence to the deal	Must	Rule set, version, matched rows, input values, outcome, timestamp stored and reportable (NFR-01)
RUL-03	As the Bank, I need hit policies First, Any and Collect supported	Must	Per 2.4 §1.1; tested with TC-01 to TC-12
RUL-04	As a rule owner, I need to suspend an outcome (e.g. R-FAST) for a segment by configuration	Must	Suspension flag per rule row or outcome; effective immediately; logged
RUL-05	As the Bank, I need conditions on data the platform lacks to evaluate conservatively	Must	Missing input → condition fails for eligibility rules; → trigger true for exclusion rules; gap logged

5. Interface requirements

ID	System	Requirement	Priority	Direction / data	Fallback
INT-01	MEO / IMPACS (balances, accounts)	Retrieve current balances and account status for all facilities on a connection; refresh on open and on submission; balance-zero check for removal	Should	Inbound; F04 balances; conduct indicators where available	Batch feed with timestamp; manual confirmation for removal with four-eyes
INT-02	CIF Portal	Search, match, create customer and parties; return CIF reference; KYC status	Must	Bidirectional; F01, F02	None (KYC must remain in CIF)
INT-03	TELLER (fees)	Fees agreed on the deal passed to fee processing at fulfilment	Could	Outbound; F04 fees	Fulfilment keys fees (as-is)
INT-04	Product systems (fulfilment)	Approved terms passed to product set-up; status returned	Could	Bidirectional; F04	Fulfilment keys from task (as-is, C11 four-eyes)
INT-05	External credit bureau / checks	Request and receive external checks with date; store result as RS-04 item	Could	Bidirectional; F06 inputs	Manual upload of result with date
INT-06	E-signature service	Send document, track status, receive signed document and certificate	Should	Bidirectional; F13	SC3-02 fallback
INT-07	Bank identity (SSO)	Authenticate users; roles and authority levels from identity or platform profile	Should	Inbound	Platform credentials
INT-08	Regulatory and MI reporting	Extract protected fields and stage events per 1.8 lineage; stage timestamps per 1.4 model	Must	Outbound; all protected field groups; F14	None
INT-09	Lending Services registration systems	Registration status (Companies House / Land Registry) reflected on G-SEC	Could	Inbound	LS updates status manually with evidence

6. Data requirements

ID	Requirement	Priority	Detail	Refs
DAT-01	Protected fields preserved in definition, capture point and timing	Must	P1 and P2 field groups per 1.8 §6: F04, F05, F06, F08, F10, F11 (P1); F01, F02, F07, F12 (P2); change control on definitions; cut-over reconciliation for P1	1.8; DD-09
DAT-02	New structured fields required by rules	Must	Variation reason codes; decline reason codes; route and eligibility evidence; authority level and matrix version; loop counter; letter status and dates; chase / extension / re-validation records; CP items; referral record; ownership history; withdraw reasons	2.4; GD-02
DAT-03	Deal-type mapping table and history treatment	Must	Old eleven types → pattern + parameter; removals and allocations re-coded where identifiable from DR-01/04; mapping retained 24 months; ESR Cleanse excluded	2.2 §4; GD-03
DAT-04	Exposure updates previously made via ESR Cleanse carried by migration	Must	Personal and NAG exposure rules specified by WS3; migration applies; reconciliation report	SD-01; GD-05; F05

DAT-05	Forbearance and waiver status migrated from batch state with reconciliation	Must	Batch logic re-implemented natively; parallel run one cycle; status reconciliation signed by SBS and MI	CE-015; GD-06
DAT-06	Stage timestamps and task time captured per the 1.4 stage model	Must	Every transition timestamped with actor; task open / close; mapping of to-be stages to baseline stages maintained	F14; GD-08; OP-27
DAT-07	Early-warning indicator fields available to RS-11	Should	Grade history, covenant status, forbearance, watch-list, prior referral on platform (R1); conduct feed via INT-01 (R2)	GD-04; RS-11
DAT-08	Ownership and segment history	Must	Transfer records with dates; segment attribution derivable at any point in time	GD-07; C26

7. Non-functional requirements

ID	Requirement	Priority	Detail	Source
NFR-01	Audit trail and evidence	Must	Every decision, rule evaluation, approval, override, transfer and status change recorded with actor, timestamp, before / after; immutable; reportable to second line and Audit	DP-02; 2.5
NFR-02	Access control and insider information	Must	Corporate connections visible only to authorised roles; access logged; segregation between line approval and sampling review; bulk ownership transfer approval	C27; DD-10
NFR-03	Configuration over code	Must	Patterns, rules, templates, SLAs, timers, queues and suspension switches changeable by configuration under Bank change control without vendor release	DP-10; RUL-01
NFR-04	Reporting and dashboards	Must	Pattern dashboards per 1.4 §6; sampling and cohort MI per 2.5; control MI (attempted breaches, exceptions); decline and withdrawal MI	1.4; 2.5; 2.11
NFR-05	Performance	Should	Deal open with context ≤ [3] s; rule evaluation ≤ [1] s; queue views ≤ [2] s for 900 concurrent users (targets for Programme to confirm)	Programme
NFR-06	Migration and cut-over	Must	DAT-03 to DAT-05 reconciled; open deals migrated with stage mapping; parallel run for regulatory statuses; rollback plan	2.5 §4.1
NFR-07	Resilience of fallbacks	Must	Every Should-priority capability has its fallback operable at go-live; fallbacks listed in this pack	2.6
NFR-08	Retention	Must	Evidence and documents retained per Bank records policy; mapping table 24 months minimum	Records policy

8. Traceability and acceptance

From	To	Check
2.6 W1 gaps (34)	Stories	Every W1 gap row cites at least one story; GP-01 → PAT-01; GP-07 → SC3-01..04; GT-04 → RUL-01..05 etc.
2.3 Automated steps (32)	Stories	Each automated step has a story with acceptance criteria
2.4 Rule sets (14)	§4 catalogue + RUL epic	Complete
2.5 CE evidence	NFR-01; SC2-04, SC2-08, SC3-04	Evidence fields named in acceptance criteria
1.8 protected fields	DAT-01	All P1 / P2 groups listed
1.7 workarounds (23)	Stories or dispositions	Each NATIVE disposition maps to a story; RETIRE items absent; INT items in §5

Acceptance into the backlog (B-06)

1. Interim release (W10): EPIC SC1, SC2, SC3, PAT, RUL and DAT-01, DAT-03, DAT-04 accepted as draft epics (DD-01 to DD-07).
2. Fit-gap (W11): each story receives Fit / Configure / Custom / Gap; Custom items go to the custom list (2.7) with justification by principle.
3. Design Authority (W12): content signed; CE and PQ status attached to affected stories.
4. v1.0 (W13): loaded into the backlog tool; Programme BA Lead confirms acceptance; Bank BA owns decomposition.
