BUSINESS BANK · BUSINESS BANKING TRANSFORMATION OFFICE · BB-BLP-BPR

1.1 Process Taxonomy and Inventory

Business lending lifecycle on BLP

Deliverable	1.1 Process taxonomy (L1–L2) and process inventory
Version	0.9 – for agreement at WS-01 (Week 3); v1.0 on Business Owner acceptance
Source	RFP BB-BLP-RFP-001; BLP current-state maps (22 pp, 02/04/2026); Phase 0 hypothesis tree (0.6)
Owner	WS1 Journeys & Process
Accepted by	Business Owner (Head of Lending Operations)

1. Purpose and conventions

The taxonomy is the single structure every later deliverable hangs off: as-is maps (1.2) are indexed to it, the activity survey (1.5) uses its L2 categories, controls (1.6) and pain points (1.9) are tagged to it, and the to-be journey patterns in Phase 2 are defined against it. It is agreed once, at WS-01, and then frozen for the engagement.

Levels

Level	Definition	Count	Example
L0	The end-to-end lifecycle	1	Business lending lifecycle
L1	Value-chain stage: a phase the customer or the bank would recognise as a distinct purpose	5 core + 2 enabling	2. Decide
L2	Process: a repeatable unit of work with a trigger, an owner and an outcome	24	2.3 Credit assessment and decision
L3	Journey stage as mapped: the swimlane level, one map each (deliverable 1.2)	26 maps	RN-2 Renewal – Deal & Credit
L4	Step: one row in a map's step table	c. 300	RN-2 D2 Within delegated authority?

Conventions

- L1 and L2 describe **what** is done, independent of who does it or which deal type triggers it. Deal types and journeys appear at L3.
- A process appears once in the taxonomy even if many journeys use it. Nine journeys use 1.3 Customer and party identification; it is listed once.
- Volumes at L2 are 12-month deal counts from the RFP, allocated by the journeys that pass through the process. They are indicative until DR-01 and DR-02 are reconciled at Week 4.
- "Owner" is the role accountable for the process operating correctly today, not the role that performs most steps.

2. L1 value chain

E1. Deposit opportunity management	no credit decision; shares 1.1–1.3 with lending; 98 in progress
E2. Platform, data and reporting	batch jobs, bots, reference data, regulatory and operational MI

Volume weight (12-month deals entering each stage): Originate 3,033 new/increase · Decide c. 25,900 · Document & Fulfil c. 25,900 · Service 22,196 · Monitor & Recover 1,516. ESR Cleanse (3,816) excluded

2.1 Why five stages and not the source's three

The source maps use three stages per journey: Lead/Customer, Deal & Credit, Completion & Fulfilment. That is a workflow view of a single deal. The taxonomy needs a lifecycle view, because two-thirds of volume is servicing of existing facilities (Renewal 12,938; Variation 7,277) and a further 1,516 deals are distress handling. Stages 4 and 5 make that work visible as its own purpose rather than as repeated origination. The three source stages map onto 1–3 and recur inside 4 and 5, which is the structural finding (F2, F3 in deliverable 1.2) that drives the to-be journey patterns.

3. L2 process taxonomy

ID	Process	Purpose	Trigger	Outcome
1. ORIGINATE				
1.1	Lead capture and qualification	Receive and record customer interest; decide whether to progress	Call, Business Lending Form, face-to-face, referral	Qualified lead or declined at overview
1.2	Opportunity creation	Record a lending or deposit opportunity against the customer	Qualified lead	Opportunity with product(s) and value
1.3	Customer and party identification	Locate or create the customer record; identify all parties to the borrowing	Any deal start	Customer and parties confirmed in BLP
1.4	Deal creation and structuring	Convert opportunity to deal; select products, limits, pricing, security, covenants, repayment	Opportunity to progress; or servicing event	Structured deal ready for analysis
2. DECIDE				
2.1	Customer and credit analysis	Assess the customer and the proposal: classifications, debt servicing, external checks, credit memo	Structured deal	Completed credit submission
2.2	Deal validation and documentation check	Confirm completeness and that facility documents match proposed terms	Completed submission	Validated deal
2.3	Delegated-authority determination	Decide whether the deal can be approved by the RM / line authority or must go to Credit	Validated deal	Routed to DA approval or Credit
2.4	Credit assessment and decision	Independent assessment by Credit; approve, decline, defer or refer	Deal outside DA	Credit decision recorded
2.5	Decline, appeal and referral handling	Communicate declines; handle appeals; refer to alternative routes	Decline at any point	Closed, overturned or referred
2.6	Post-approval change management	Handle customer changes after approval; decide materiality; re-process if required	Change request after approval	Approval maintained or re-decided
3. DOCUMENT & FULFIL				
3.1	Facility documentation	Generate, issue, track and check the facility letter / agreement	Approved deal	Executed facility letter on file
3.2	Security preparation and perfection	Prepare, execute and register security; record complete in BLP	Approved deal with security	Security perfected
3.3	Conditions and pre-conditions management	Track and evidence conditions precedent and covenant set-up	Approved deal	All conditions met
3.4	Fulfilment	Set up or amend the facility on product systems; release funds	Ready for fulfilment	Facility live; BLP updated
4. SERVICE				
4.1	Renewal and extension	Renew facilities at review date with no structural change; short-term extension where review cannot complete	Review / maturity date approaching	Renewed or extended facilities
4.2	Variation and restructure	Amend terms, parties, products, pricing, security or covenants of existing facilities	Customer or bank request	Varied facilities

4.3	Pre-approved drawdown and reallocation	Draw tranches of staged facilities; allocate shadow limits to products	Customer request or task date	Funds released within pre-approved limit
4.4	Facility removal and exit	Repay, release security and remove facilities	Customer request or bank decision	Facilities removed; security released
5. MONITOR & RECOVER				
5.1	Covenant and condition monitoring	Track covenant tests, tracking items, waivers and expiries	Scheduled dates; waiver expiry	Compliance status; breaches flagged
5.2	Distress identification and CAP referral	Identify financial difficulty; refer to SBS/PS with Credit authority	RM judgement, Credit flag, arrears, breach	Referral accepted or returned
5.3	Categorisation and CAP strategy	Categorise the connection; set and record the strategy; forbearance, ERV, provisions	Accepted referral	Strategy in place; records updated
5.4	Recovery and exit management	Execute retention-exit or recovery-secure strategy	Strategy approved	Exit, recovery or return to mainstream
E1. DEPOSIT OPPORTUNITY MANAGEMENT (enabling)				
E1.1	Deposit opportunity recording and closure	Record deposit interest; mark won or declined	Customer interest	Won / Declined by Bank / Declined by Customer
E2. PLATFORM, DATA & REPORTING (enabling)				
E2.1	Scheduled processing	Batch jobs: auto-reoriginate at 90 days; forbearance status; waiver expiry; officer-code reassignment	Schedule	Records updated in bulk
E2.2	Robotic process automation	Blue Prism bots performing BLP transactions	Schedule or event	Transactions completed
E2.3	Reference and user administration	Users, roles, officer codes, product and rate tables	Change request	Reference data maintained
E2.4	Regulatory and operational reporting	Extract and report BLP data for regulatory returns and MI	Reporting calendar	Returns and MI produced
E2.5	Records migration (ESR Cleanse)	Transfer records from the orange lending file; update personal and NAG exposure	Migration programme	Records on BLP — pending SD-01

4. Process inventory

One row per L2 process. Journeys and deal types that use the process, owner, systems, 12-month volume, controls and known issues. Map references point to deliverable 1.2.

ID	Journeys / deal types	Owner	Performed by	Systems	12-m vol.	Controls	Known issues (pre-validation)	Maps
1.1	New, Increase, Shadow Limit	Head of segment	RM; Business Direct	SharePoint form, phone, BLP	c. 3,000+ enquiries (TBC)	C0	No lead register; overview criteria undocumented; CYB card form TBC	NM-1, SL-1
1.2	New, Increase, Shadow Limit; deposits	Head of Lending Ops	RM	BLP	3,033 + 98 dep.	—	Deals can bypass opportunity (source note)	NM-1, SL-1, DP-1
1.3	All journeys	Head of Lending Ops	RM; SBS	BLP, CIF Portal	c. 26,700	C1	Five identical steps repeated in every journey; separate login	All *-1 maps
1.4	All deal types	Head of Lending Ops	RM; SBS	BLP, MEO, IMPACS (balances)	c. 26,700	—	Balance latency TBC; 11 deal types, 1 unused, 1 “DO NOT USE”	*-1, *-2
2.1	New, Increase, Renewal, Variation, SL, CAP	Head of Credit Risk Policy	RM; SBS	BLP + external credit checks + spreadsheets (TBC)	c. 25,900	C2	“If required” on renewal/variation without a criterion; off-platform elements TBC	*-2
2.2	As 2.1 + SR, SD	Head of Lending Ops	RM	BLP	c. 25,900	C3, C4	Manual document check against terms	*-2
2.3	As 2.2	Head of Credit Risk Policy	RM; line authority	BLP (data), manual check	c. 25,900	C5	Manual although limit, grade, exposure are in BLP (H-E2); DA split by deal type unknown	*-2
2.4	Deals outside DA; CAP Referral	Chief Credit Officer	Credit	BLP	TBC (DR-03)	C6, C7, C13	Unbounded deferral loop; distress screen after full assessment; queue time not visible	*-2, CR-2
2.5	Any decline	Head of Lending Ops	RM; Credit	BLP (TBC)	TBC	C20, C21	Not mapped; reason capture and appeal route unknown	EX-01
2.6	New, Increase, SL	Head of Credit Risk Policy	RM; Credit	BLP	TBC	C22	Not mapped; “re-processed” with no materiality rule	EX-03
3.1	All approved deals except CAP Strategy	Head of Lending Ops	RM; Business Ops; Corporate Associate	BLP (generate), email / post (issue)	c. 25,000	C8	Manual issue; no sent/returned tracking; off-platform for SL and SD; 3-month reset	*-3, SR-2, SD-2

3.2	New, Increase, Variation, SL, SR, SD; removal	Head of Lending Services	Lending Services; Securities Team	BLP + LS systems (TBC)	TBC	C10, C23	Not mapped; instruction channel and elapsed time unknown	EX-05, RF-2
3.3	As 3.1	Head of Lending Ops	RM	BLP	c. 25,000	C9	No single view of outstanding conditions	*-3
3.4	As 3.1 where facility changes	Head of Fulfilment	Fulfilment	BLP, IMPACS, TELLER, product systems	TBC	C11	Hand-off by message; queue time not visible; renewals may not need fulfilment action	*-3, RF-2
4.1	Renewal, EPR	Head of Lending Ops	RM; Credit	BLP, BDRM report	14,857	as 2.x, 3.1	Report-based trigger; full credit flow despite no structural change (H-A1); EPR chains	RN-1/2/3
4.2	Variation, Increase (restructure)	Head of Lending Ops	RM; Credit	BLP	7,277 (+ part of 2,338)	as 2.x, 3.x	No triage by materiality (H-A4); security re-instructed by default	VA-1/2/3
4.3	Shadow Limit Reallocation, Staged Drawdown Allocation	Head of Lending Ops	RM; Credit on exception	BLP; off-platform letters	62 (+ allocations TBC)	C19, C5	Existing fast-track model; manual limit reduction; off-platform letters; deal-type workaround	SR-1/2, SD-1/2
4.4	Remove All Facilities (recorded as Variation TBC)	Head of Lending Ops	RM; Securities; Fulfilment	BLP	TBC	C10, C12	Not a deal type; system release before physical release; associated parties TBC	RF-1/2
5.1	All live facilities	Head of Credit Risk Policy	RM; batch jobs	BLP; waiver-expiry and forbearance batch jobs	n/a	TBC	Not mapped in source; partly automated by batch	— (WS-13)
5.2	CAP Referral	Head of SBS	RM; Credit; SBS	BLP	794	C7, C13, C14	Trigger undefined; two sequential authorities; elapsed time unknown	CR-1/2, EX-04
5.3	CAP Strategy	Head of SBS	SBS	BLP; memo off-platform	722	C15–C18	Protected regulatory fields (forbearance, ERV, provisions)	CS-1/2
5.4	Post-strategy	Head of SBS	SBS; Retention Exit; Recovery Secure	BLP + recovery systems (TBC)	n/a	TBC	Beyond source maps; boundary with Phase 1 scope to confirm at WS-07	—
E1.1	Deposits	Head of segment	RM	BLP	98 in progress	—	No reason code; rate-exception approval outside BLP; location decision SD-03	DP-1
E2.1	n/a	Head of Technology Ops	Batch	BLP	4 jobs	TBC	Each job a candidate workaround (H-D1); volumes via DR-09	— (1.7)

E2.2	n/a	RPA team	Blue Prism	BLP	TBC	TBC	Bot inventory via DR-09	— (1.7)
E2.3	n/a	BLP admin	BLP support	BLP	c. 900 users	TBC	"DO NOT USE" still selectable (I-02)	—
E2.4	n/a	Head of MI & Reg Reporting	MI team	BLP extracts	per calendar	TBC	Lineage undocumented (H-F1); manual adjustment (H-F2)	— (1.8)
E2.5	ESR Cleanse	Replacement Programme (proposed)	RM / Business Ops	BLP; orange lending file	3,816	TBC	Recorded as a deal type; 12.5% of volume is not customer activity	— (SD-01)

5. Deal type to process mapping

Which L2 processes each deal type passes through today. This is the skeleton of deliverable 1.3 (deal type × stage matrix) and the test for hypotheses B1–B4.

Deal type	12-m vol.	%	1.1	1.2	1.3	1.4	2.1	2.2	2.3	2.4	3.1	3.2	3.3	3.4	5.2	5.3	Journey map
New (New Money)	695	2.3	●	●	●	●	●	●	●	○	●	●	●	●			NM
Increase	2,338	7.7	●	●	●	●	●	●	●	○	●	●	●	●			NM
Renewal	12,938	42.3			●	●	●	●	●	○	●		●	○			RN
Extension Pending Review	1,919	6.3			●	●	(●)	●	●	○	●		●	○			RN
Variation	7,277	23.8			●	●	(●)	●	●	○	●	○	●	○			VA, RF
CAP Referral	794	2.6			●	●	●	●		●					●		CR
CAP Strategy	722	2.4			●	●	(●)	●								●	CS
Shadow Limit Reallocation	62	0.2			●	●		●	●	○	●	○	●	●			SR
Staged Drawdown	0	0	No deals in 12 months; tranches set up via Term Lending product (SL-1 S9); allocation via SD-1 recorded as Staged Drawdown + Variation request type														SL, SD
ESR Cleanse	3,816	12.5	Records transfer, not a customer deal; no credit decision; proposed out of deal model (SD-01)														—
DO NOT USE	—	—	Discontinued; still selectable (I-02)														—

● always · (●) "if required" / conditional · ○ only when outside delegated authority or when facility changes · Deposits use 1.1–1.3 then E1.1 only

What the matrix shows before any workshop

- Eight live deal types use the same processes 1.3, 1.4, 2.2 and 3.1. The differences are at 1.1–1.2 (new customer or not), 2.1 (full vs. “if required”), 3.2 (security or not) and 3.4 (fulfilment or not).
- Renewal and EPR, 48.6% of volume, pass through every decision process (2.1–2.4) that New Money does.
- Three of eleven deal types carry no live customer process (Staged Drawdown, ESR Cleanse, DO NOT USE).
- The two fast-track types (Shadow Limit Reallocation; Staged Drawdown Allocation) skip 2.1 and reach 2.4 only on exception: the pattern the to-be design generalises.

6. Roles and systems touched, by L1 stage

L1	RM / Business Direct	Credit	Lending Services / Securities	Fulfilment	SBS / PS	Business Ops / Corp. Associate	Systems
1 Originate	●				● (CAP)		BLP, CIF Portal, SharePoint form, MEO
2 Decide	●	●			● (CAP)		BLP, external credit checks, MEO/IMPACS balances
3 Document & Fulfil	●		●	●		● (letter check)	BLP, email/post, IMPACS, TELLER, product systems, LS systems (TBC)
4 Service	●	● (exception)	●	●		●	BLP, BDRM report, off-platform letters
5 Monitor & Recover	●	●			●		BLP, batch jobs, recovery systems (TBC)
E2 Platform & data							BLP, Blue Prism, batch scheduler, MI extracts

7. Use of the taxonomy in later deliverables

Deliverable	How the taxonomy is used
1.2 As-is maps	Each map indexed to one or more L2 processes; the map index shows coverage and gaps (5.1, 5.4, E2.x have no source map)
1.3 Deal type × stage matrix	Section 5 of this document, extended to step level after validation
1.4 / 1.5 Baselines	Cycle time per L1 stage; activity survey categories are the 24 L2 processes plus “other”
1.6 Controls	Each control tagged to the L2 process it protects
1.7 Workarounds	Each bot / batch job tagged to the L2 process it substitutes for
1.9 Pain points	Tagged to L2 and L4
Phase 2 journey patterns	Patterns are defined as paths through L2 processes with parameters; the taxonomy does not change, the paths do

8. Items to agree at WS-01

- Whether 5.4 Recovery and exit management is in scope beyond the hand-off from CAP Strategy, or stops at the SBS boundary
- Whether 5.1 Covenant monitoring is mapped in Phase 1 (no source map exists) or baselined from batch-job data only
- Confirmation that E2.5 ESR Cleanse sits under enabling processes pending SD-01, not under Originate
- Owner names against each L2 process
- Any L2 process performed today that does not appear above
